Graduate Recruitment

Davies Maguire is an award-winning well-established firm of Structural Engineers with a passion for Engineering and Architecture. We have a reputation for excellence, and were winners in the NCE Consultants of the Year in 2017 for Technical Excellence and in the top 20 in the NCE100. Our experience and enthusiasm has allowed us to rapidly expand, and establish strong relationships with clients and architects.

We are looking to recruit graduates with a Civil or Structural Master's Engineering degree to join our growing office, based in central London. We are looking for candidates with talent and commitment, who are willing to take ownership of their assignments.

Our open-plan office, in conjunction with our flat management structure, means that more senior staff are always involved in projects, and easily approachable for support where needed. We believe that this gives young engineers good motivation and a great opportunity to develop as they work towards Chartered status. We run certified training schemes supporting chartership with both the ICE and IStructE.

Please send a covering letter and CV with contact details if you are interested to jpo@dmag.com

Check our website www.dmag.com for more information on our projects, recruitment and the office.
